#### **Profiles**

in Linkedin

### **Summary**

I specialize in building complete web applications — from clean, responsive frontends with React and Next.js to powerful backends with Fastify, Express.js, and SQLite or other databases.

I enjoy solving real-world problems with scalable and elegant code.

### **Education**

1337 School 2023 - present

Intensive program based on project-based (peer-to-peer) learning,

focused on software development, algorithms, C/C++ programming, memory management, full-stack web development (HTML, CSS, JavaScript, Node.js, React, etc.), as well as Unix systems, Git, and cybersecurity. Developed strong skills in problem-solving, autonomy, teamwork, and rapid

adaptation to new technologies.

### udemy

full-stack-web

2024 - 2025

**Completed a full web development course**, covering HTML, CSS, JavaScript, React, Node.js, Express, MongoDB, API creation, and authentication.

### **Projects**

## AIVITA (personal project) 2025 - present

- Built with Next.js, TypeScript, Fastify, and SQLite.
- Provides **personalized daily workout and meal plans** tailored to user goals.
- Designed a clean, responsive UI for an intuitive fitness experience.
- Managed the complete stack: frontend, backend, and database.

### ft\_transcendence (1337) 2025 - present

- Built with Next.js (frontend), Fastify (backend), and SQLite3 (database).
- Designed a clean and responsive UI using **Tailwind CSS**.
- Implemented real-time chat and an interactive ping-pong game with tournaments.
- Integrated multi-provider authentication (Google, GitHub, and 42).
- Managed the entire stack: frontend, backend, and database.

### webserv (1337) 2025

### Implementation of an HTTP server from scratch in C++98.

Advanced systems project at 1337.Implemented from scratch in **C++98** with full support for **HTTP/1.1**.

- Features include non-blocking I/O with poll, CGI handling (Python/PHP), and support for GET, POST, DELETE methods.
- Managed configuration parsing, error handling, sessions, and cookies.
- Advanced systems project at 1337.

### Inception (1337) 2024

### Containerized Infrastructure

- Set up a complete infrastructure using **Docker** with isolated containers for **NGINX**, **WordPress**, **PHP-FPM**, **MariaDB**, and **Redis**.
- Configured networking, volumes, and services to enable seamless interaction and persistence.
- Focused on manual configuration for security, scalability, and maintainability.
- DevOps project at 1337.
