Summary

I specialize in building complete web applications — from clean, responsive frontends with React and Next.js to powerful backends with Fastify, Express.js, and SQLite or other databases.
I enjoy solving real-world problems with scalable and elegant code.

Education

1337 School   **2023 - present**

Intensive program based on project-based (peer-to-peer) learning,

focused on software development, algorithms, C/C++ programming, memory management, full-stack web development (HTML, CSS, JavaScript, Node.js, React, etc.), as well as Unix systems, Git, and cybersecurity.
Developed strong skills in problem-solving, autonomy, teamwork, and rapid adaptation to new technologies.

udemy   **2024 - 2025**
                                                              full-stack-web

Completed a full web development course, covering HTML, CSS, JavaScript, React, Node.js, Express, MongoDB, API creation, and authentication.

Projects

AIVITA (personal project)   **2025 - present**

aivita is an AI-powered fitness and nutrition web app that generates personalized daily workout and meal plans based on user goals. Built with Next.js, TypeScript, Fastify, and SQLite.

ft_transcendence (1337)   **2025 - present**

Full-stack web application built with Next.js (frontend), Fastify (backend), and SQLite3 database.
Designed with Tailwind CSS.
1337 project – handled frontend, backend, and database management.

webserv (1337)   **2025**

Implementation of an HTTP server from scratch in C++98.
Advanced systems project at 1337.

Inception (1337)   **2024**

Setup of a containerization infrastructure using Docker.
DevOps project at 1337.
